Mahadeer Mohamed

Software Tester | Front-End Developer

Phone: 7339426461 | Email: mahadeer777@gmail.com | LinkedIn: linkedin.com/in/mahadeer7

PROFESSIONAL SUMMARY

Software Testing and Front-End Developer with strong knowledge of Manual Testing concepts including SDLC, STLC, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, System Testing, End-to-End Testing, GUI Testing, Test Case Design, and Defect Reporting. Proficient in Java, Object-Oriented Programming, SQL, and Git. Hands-on experience developing web applications using HTML, CSS, JavaScript, and React.js. Passionate about software quality, continuous learning, and building a career in QA Automation.

TECHNICAL SKILLS

Programming: Java, Java OOP

Web Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap

Database: MySQL, SQL Fundamentals, CRUD Operations

Manual Testing: SDLC, STLC, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, System Testing, End-to-End Testing, GUI Testing, Test Case Design & Execution, Bug Reporting & Defect Tracking

Agile & Tools: Agile Scrum, Jira, Zephyr

Version Control & Tools: Git, GitHub, Vercel, ChatGPT, Computer Networks

PROJECTS

Grand Trading Company - Product Ordering Web Application | Live Project

Tech Stack: Next.js, TypeScript, Email Integration, Vercel | Tool: ChatGPT

- Developed a responsive product ordering web application with component-based architecture.
- Performed manual testing of product ordering workflows, including test case design and execution for product selection, quantity validation, and order submission.
- Conducted functional testing to verify product catalog behavior, order validation, and automated email-based order confirmation workflows.
- Identified and reported defects during test execution and verified application behavior against expected results.

Staff-Admin Project Management System | Live Project

Tech Stack: Next.js, TypeScript, Tailwind CSS, Firebase | Tool: ChatGPT

- Developed a role-based project management system enabling staff submissions and admin approval workflows.
- Performed manual testing of staff and admin workflows by designing and executing test cases for project submission, approval, rejection, and status tracking.
- Conducted functional testing to verify persistent authentication, role-based redirection, and real-time status updates.
- Identified and reported defects during test execution and verified application behavior against expected results.
- Validated the admin-controlled scoring system to ensure scores were updated only for approved submissions.

INTERNSHIP

Front-End Development Intern - Suven Consultants & Technology Pvt Ltd

Oct 2023 - Nov 2023 | Remote

Book Management Web Application

- Developed a book management web application using HTML, CSS, and JavaScript to perform dynamic CRUD operations.
- Implemented form-based user input with DOM manipulation to add and render book data dynamically.
- Built real-time add and delete functionality using JavaScript event handling without external frameworks.
- Designed a responsive card-based layout with modal overlays to improve usability and user interaction.

EDUCATION

B.Tech in Information Technology - Crescent University (2021-2025)

Higher Secondary (Computer Science) - A.R.R.M.H.S.S (2020-2021)
